Poster Presentation Guidelines

The conference program includes a total of more than 72 poster presentations over two sessions. You will be expected to attend your display over the course of the session in which you poster paper is scheduled. Most or all poster presentations will be displayed on an upright panel fold. You should plan to display your paper on a large paper (about 70 cm width, 130cm high), or on six pages of A3 size papers.

You may prepare some material (photos, figures, graphs, Text, topic charts, etc.) with additional graphics on hand as necessary to facilitate further discussion with your audience. We urge your attention to large and legible lettering. Each graphic should include a heading proper labeling of plots and graphs, and any other annotations as appropriate to a clear presentation.

In order to improve the material it is possible to use a system of colors, such as purple, green, red, yellow, etc.
